Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over European patent 540,058 (Osawa) in view of Wong in further view of Chen.

Osawa discloses a method for manufacturing a magnetic recording medium comprising laminating a non-magnetic under-layer on a non-magnetic substrate (p 3, line 5-6), laminating a magnetic layer on said under-layer by forming an oxide layer on a surface, depositing a magnetic layer component comprising ferromagnetic grains and grain boundaries surrounding said grains (p 3, lines 6-13). There is subsequently laminated a protective film on said magnetic layer and a liquid lubricant layer on the protective film (p 5, lines 14-16).

Osawa does not disclose exposure to an atmosphere of oxygen-containing gas or that the magnetic layers may be repeated multiple times.

Wong discloses exposure to an atmosphere of oxygen-containing gas during the manufacture of a magnetic recording medium (col 2, lines 1-4).

It would have been obvious to one with ordinary skill in the art to include exposure to an atmosphere of oxygen-containing gas during the manufacture of a magnetic recording medium because Wong teaches equivalence (col 2, lines 1-4).

Chen discloses that magnetic layers may be repeated multiple times (fig 1).

It would have been obvious to one with ordinary skill in the art to include magnetic layers that may be repeated multiple times because Chen teaches advantages of such (col 2, lines 15-35).

Information Disclosure Statement

3. The information disclosure statement filed 1-14-04 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to regarding foreign patent reference and other prior art therein has not been considered.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alain L. Bashore whose telephone number is 571-272-6739. The examiner can normally be reached on about 7:30 am to 5:00 pm (Mon. thru Thurs.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
